Job Description			

ABOUT SPIDERROCK PLATFORM SERVICES

SpiderRock is a Chicago-based technology firm focused on clever software engineering and developing innovative solutions to enable the SpiderRock family of companies to service complex global derivatives markets. Our cloud design allows us to engineer software at a fast pace to our companies' growing and diversified user base. These products are relied upon by industry leaders to systematically reduce costs, seize edge and implement successful strategies on global multi-asset scale. Our team and culture is collaborative and hardworking, fast-paced and challenging.

We are searching for a .Net/C# Software developer to contribute to the design and development of the SpiderRock platform. We expect this individual to have a desire to learn, participate in engineering discussions, and contribute to the various components of the SpiderRock cloud, APIs and software. We seek a candidate with a strong desire to contribute to our development team's fast paced development cycle.

ROLE AND RESPONSIBILITIES

Your day to day:

- Learn and gain experience on a variety of Windows based, C# technologies
- Assist in debugging and analyzing our user APIs and interfaces (GUI, MySQL, REST API)
- Learn about financial markets
- Work with IT and client support teams to troubleshoot issues
- Deep-Dive learning sessions on the SpiderRock software philosophy
- Provide SpiderRock development teams and business units with software solutions and ideas
- Contribute to our client support team's software quality assurance
- Assist integration efforts for SpiderRock's growing client base

QUALIFICATIONS AND EDUCATION REQUIREMENTS

Qualified candidates will have a minimum 3 years' experience in software development. BS or BA math, engineering, computer science or relevant field or experience

WHAT IT TAKES

What does it take to successfully contribute to the SpiderRock development team?

- Demonstrable .NET/C#/WPF/R/REST experience
- Debugging Experience
- Strong work ethic
- Participate in development team meetings, discussions and process activities.
- Independent project and time management

PREFERRED SKILLS

Professional, motivated attitude. Strong interpersonal skills, programming skills, and a desire to apply that knowledge to a fast-paced, high pressure technology environment.

Environment details:

- OS: Windows, Linux
- Development: Visual Studio, Subversion
- Languages: C#, WPF, Statistical software (R or S), ElasticSearch (REST), Python, PowerShell
